# INTRODUCES

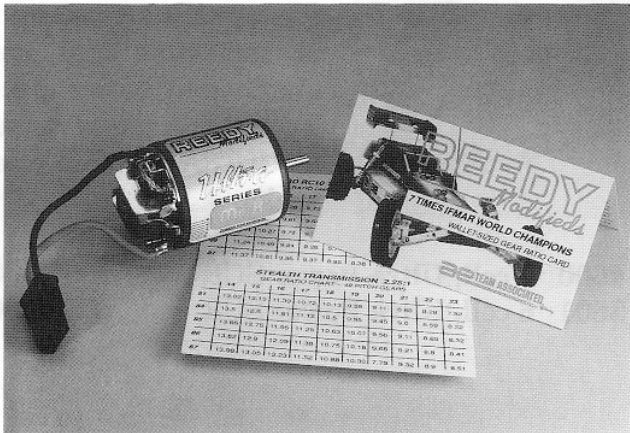

## ULTRA-TORQUE SERIES Modified Motors

### Ultra Torque magnets feature:

★ Stronger magnetic field which supplies a broader power band and more power efficient motor.

★ Resistance to high temperatures, providing a consistent, stronger running motor during the second half of the race when other magnets start to fade due to heat.

## ELITE SERIES Stock Motors

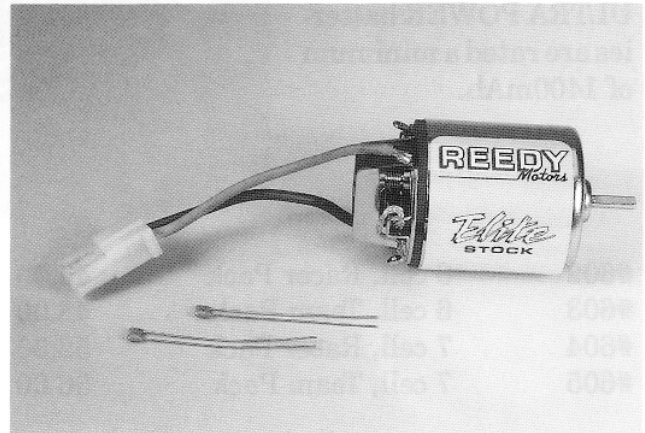

### Special features:

- ★ Competition "silver" brushes
- ★ Low Resistance silver shunts
- ★ Individually tuned and tested
- ★ Run-in prior to testing to properly seat brushes
- ★ Competition "copper head" springs
- ★ Two motor capacitors supplied to reduce motor noise affecting radio

# ANNOUNCES

## Reedy 1400mAh SCR's

An SCR battery that gives you the performance and power for top competition in stock class racing and 2WD off-road modified. These new cells are strong to withstand repeated charges and do not require long periods of rest between runs. All ULTRA POWER batteries are rated a minimum of 1400mAh.

## Reedy ULTRA POWER SCR's

Starting with the new Sanyo 1400 mAh SCR battery, each cell is individually tested and the top capacity cells selected for use in Ultra-Power packs. These cells are then cycled and tested at 20 amps to give a better indication of on-track performance. Only the top cells are selected at this time and are matched by both capacity and voltage to make up ULTRA-POWER race packs.

#602	6 cell, Racer Pack	45.00
#603	6 cell, Team Pack	48.00
#604	7 cell, Racer Pack	52.50
#605	7 cell, Team Pack	56.00

#600	7 cell, Ultra Power SCR	\$70.00
#601	6 cell, Ultra Power SCR	\$60.00
