PRESS RELEASE

## SC10 4x4 Kit 1:10 Scale 4WD Electric Short Course Truck Kit

Team Associated, the only RC car company with 24 World Championships is proud to present the SC10 4x4!

Starting with a clean sheet of paper, Team Associated's Area 51 design engineers have created the ultimate four-wheel-drive short-course racer, the SC10 4x4.

Its composite modular chassis design with sealed receiver box and removable ESC tray, combined with innovative features such as 13mm big bore shocks, a decoupled slipper clutch, and a hybrid belt/gear drive system, makes the SC10 4x4 unlike any other short-course truck on the planet. In addition to these unique features, a long list of competition-proven components create an extremely high performance and durable state-of-the-art race truck.

It's not often a new platform is introduced that redefines a class. The engineers of Area 51 seized the opportunity to create the next legendary vehicle. Once you build and drive the SC10 4x4 for yourself, we think you will agree—this is the 4x4 short course race truck that you have been waiting for!

The SC10 4x4 kit is exactly what you have come to expect from Team Associated—one more **Champion by Design.**

*12mm hex drive KMC® replica wheels front and rear with aggressive short course racing tires.*

*CVAs with captured drive pins and heavy duty 6mm alloy axles*

*Sealed water-resistant receiver box and removable ESC tray for easier maintenance.  
Uses most 540 and 550 brushless motors.*

*13mm big-bore threaded shocks with low-friction X-ring seals and rubber boots.*

*Unique dual gearbox drive train coupled together with a 5mm heavy duty belt system with external tension adjustment. 32-pitch front and rear gearboxes with sealed fluid-filled differentials.*

*Decoupled center slipper clutch allows for front and rear wheel drive to slip independently, resulting in more traction and stability on bumpy track conditions*

## SC10 4x4 Kit Features:

- Unique dual gearbox drive train coupled together with a 5mm heavy duty belt system with external tension adjustment
- 32-pitch front and rear gearboxes with sealed fluid-filled differentials
- Decoupled center slipper clutch allows for front and rear wheel drive to slip independently, resulting in more traction and stability on bumpy track conditions
- CVAs with captured drive pins and heavy duty 6mm alloy axles
- 12mm hex drive KMC® replica wheels front and rear with aggressive short course racing tires
- Championship short course racing body (clear), with Team Associated decal sheet
- 13mm blue aluminum big-bore threaded shocks with low friction X-ring seals
- Composite modular tub chassis with Low-CG and Low Polar Moment design
- Enclosed water-resistant receiver box, and removable ESC tray for easy clean up and maintenance
- Ball bearing steering system with adjustable steering stops
- All metric hardware and ball bearings throughout
- Uses most 540 and 550 brushless motors

### #90004

SC10 4x4 Kit  
MAP: \$269.99  
MSRP: \$439.99  
UPC: 784695 900042  
Availability: March 2011

### SC10 4x4 Kit Specifications:

Scale:	1:10
Power:	Electric
Length:	550mm
Width:	293mm
Weight:	2775g*
Wheelbase:	327mm
Internal Gear Ratio:	2.57:1
Drive:	4WD

\* Weight will vary depending on electronics used.
