

For Immediate Release: May 4, 2011

#7047 SC10 RS RTR, Monster Energy

Official R/C Car of the

## 1:10 Scale Ready-To-Run Electric 2WD Off Road Race Truck

Team Associated's SC10 RS (Race-Spec) is a Ready-To-Run R/C replica of the trucks driven in the Lucas Oil Off Road Racing Series. After winning the 2010 R.O.A.R. National Championships the SC10RS has received some major upgrades including the water-resistant high-power XP SC700 Brushless Speed Control, and a water-resistant enclosed receiver box. The suspension also received an upgrade with the addition of adjustable blue anodized aluminum V2 coil-over shocks.

The 2.6:1 ratio gearbox includes a sealed gear differential with new heavy-duty internal gears and the externally adjustable V2 slipper clutch. The new KMC® replica hex-drive wheels come standard on the SC10RS with high traction JConcepts racing compound rear tires and inserts for more grip. The XP3-SS 2.4GHz 3-channel radio system and XP S1903MG metal gear steering servo round out the SC10RS as a potent short course race machine!
