

For Immediate Release: Sept. 25, 2012

B44.2 Factory Team Kit

1:10 Scale 4WD Electric Off Road Competition Buggy Kit

The RC10B44 is a proven winning platform with two I.F.M.A.R. World Championships and four R.O.A.R. National titles under its belt! The B44.2 Factory Team kit takes the next step in drawing out every opportunity to maximize the 4WD buggy's potential.

The big news on the B44.2 is the new Factory Team 12mm 'Big Bore' hard-anodized shocks. The shocks feature threaded collars, machined aluminum shock caps with bleed screws, and are completed with TiN "Gold" 3mm shock shafts. The end result is a 12mm shock that delivers a plush and compliant ride that keeps the B44.2's tires planted on the ground.

The B44.2 also received an updated 2.5mm carbon-fiber chassis that is 8mm longer and 3mm narrower than the previous model. This not only improves stability and overall handling of the B44.2 but also accommodates the new LiPo quick-change battery mounting system, and VTS multiplate slipper assembly.

The engineers in Area 51 have once again evolved the B44 to keep it a winner, while everyone else is just trying to keep up. If you're ready to step up your 4WD program, the B44.2 is ready for you!

B44.2 FACTORY Team

2-Time I.F.M.A.R. World Champion and 4-Time R.O.A.R. National Champion!

Factory Team 12mm 'Big Bore' hard-anodized threaded shocks

Composite battery trays with integrated spacers and quick-change battery straps

VTS slipper assembly with high-rate spring

Complete set of Factory Team CVA drive shafts with pin retainer clips

Factory Team 0° aluminum rear hubs with 12mm clamping hexes

Complete set of Factory Team blue titanium turnbuckles

Factory Team blue aluminum cam motor mount set

RC10B44.2 Factory Team Kit Features:

- Factory Team 12mm 'Big Bore' hard anodized aluminum threaded shocks with TiN "Gold" 3mm shock shafts
- Updated 2.5mm carbon-fiber chassis +8mm optimized for LiPo saddle packs
- VTS slipper (variable torque, multi-plate slipper with 3 drive surfaces) assembly featuring a high-rate spring
- Composite battery trays allow for battery position adjustment with integrated spacers and quick-change battery straps
- Updated 3.5mm front shock tower and 3.0mm rear shock tower designed specifically for the new 12mm shocks
- Factory Team 12mm aluminum rear clamping hexes and rear hex wheels
- Updated front top deck for increased rigidity featuring locking antenna mount
- Factory Team 7075-T6 blue aluminum 0° rear hubs with oversized outer bearing
- Updated front suspension arm for increased durability
- Blue aluminum cam-type motor mount for easier and more secure gear mesh adjustments
- JConcepts Finisher +8mm body (clear) and Factory Team protective chassis tape included

RC10B44.2 Factory Team Kit Specifications:

Scale:	1:10
Power:	Electric
Length:	378mm
Width:	250mm
Weight:	1715g*
Wheelbase:	284mm
Internal Gear Ratio:	2.5:1
Drive:	4WD

* Final weight will vary with the actual electronics and tires used to complete the B44.2

Items shown but not included: Reedy motor, Reedy battery, LRP ESC, XP servo, XP receiver, pinion gear, and tires. Body comes clear. Assembly and painting required.

UPC: 784695 090620	#9062	RC10B44.2 Factory Team Kit	MAP: \$369.99	MSRP: \$599.99	Available: October 2012
