

For Immediate Release: Dec. 4, 2012

APEX Touring V-Type Ready-To-Run 1:10 Scale Ready-to-Run 4WD Electric Touring Car

The Qualifier Series is Team Associated's exciting new line of sport-level products that are designed to be FUN above all else, easy to use, durable, lower cost, and provide an easy way to get into the RC hobby. When great looks and high performance are combined with quality features and value pricing, it becomes the ultimate sport product. When all this is offered from Team Associated, it's nothing short of awesome.

The APEX Touring Car is the newest release from the Qualifier Series. It's a fully assembled, Ready-to-Run, Reedy brushless-powered, 4WD touring car that even includes a Reedy WolfPack 6-cell battery wired with a Deans® power connector.

Additional features include the XP water-resistant speed control and XP 2.4GHz radio system. The front and rear sealed gear differentials are connected together with a tough aluminum drive shaft that handles all of the Reedy brushless power. Imperfections in the road are managed by four fluid-filled, adjustable, coil-over shocks. The treaded high grip racing tires are mounted on 10-Spoke hex drive wheels, and it's topped off with a custom Team Lucas detailed race body.
