RC10B4 Buggy

RC10B4 RTR SE

B4 Factory Team

Factory Team: aluminum

Factory Team: titanium

Factory Team: threaded bodies

Factory Team: carbon

Photo shows optional items not included in all kits

Features

- Fully adjustable caster, camber, toe-in, and shock position.
- Angled bellcrank steering minimizes bump steer to maintain constant steering angles throughout the full range of suspension travel.
- Front shocks are mounted behind the shock towers. All four suspension arms are the same length, and the "captured" hinge pin design uses no e-clips.
- Prepainted body (RTR version only).
- New 2.60:1 laydown Assoc. transmission.
- MIP CVDs and PTFE-coated shocks in kit version.
- Sealed ball bearings.
- Lower motor, battery, body and wing mounting positions give the B4 a lower CG for higher cornering speeds and greater stability.
- Kimbrough spur gear included.

RTR: Radio, and your choice of blue or red body.

Front shocks mounted behind front tower (kit shocks shown)

High torque capacity, double-sided slipper
