

***PRE-RELEASE NOTICE***

# **RC10 DS** **QUALIFIER**

## ***FINALLY—AN AFFORDABLE PARKING LOT RACER!***

Team Associated introduces the DS Qualifier, an electric parking lot racer with a true racing heritage at an unbelievably low price!

The DS Qualifier features the same rugged Aluminum tub chassis construction, oil-filled shocks, Stealth transmission, 23-turn DS Spec motor, resistor-style speed control and fully tunable independent suspension found in the original RC10DS kits. Front and rear anti-roll bars, mounted and trued foam racing tires for outstanding traction.

The DS Qualifier also comes complete with its own charge cord for charging from a 12-volt automotive battery.

But the real news is that you get all these features at a suggested retail price of only \$159.00! The DS Qualifier is perfect for anyone who wants it all... rugged construction, race-bred tunability, and a super-low street price. And, there's a line of "Factory Team" components available for the DS series, such as "Factory Blue" Titanium turnbuckles, carbon-fiber suspension components, and lightweight blue screw kits for strong aftermarket sales potential.

Team Associated's DS Qualifier...there has never been a better parking lot racer offered in this price range.

#8082 DS Qualifier ..... list \$159.00

#8083 DS Qualifier ..... list \$159.00
