

RC10 the Off-Road Champion

This is the car that won both the ROAR and NORRCA Nationals for 1988, outrunning the best the world could offer!

The RC10 is manufactured in America. Spare parts and accessories are on-the-shelf items at the Associated factory, and are readily available in hobby shops throughout the world.

1/10 Scale Electric R/C Off-road Race Car.

All kits include the following:

- Heat treated, gold anodized aircraft aluminum chassis tub.
- Replaceable gold anodized nose (skid) plate.
- Adjustable wheelbase.
- Two spring sets, low and high rate.
- High volume hydraulic shocks, double O-ring sealed, gold anodized.
- Adjustable limited-slip ball dif (can be locked for production class).
- Servo saver, linkage and universal servo mounts fit most radios.
- Prelubricated oilite bushings throughout (except ball bearing kits).
- Quick-change battery and body mounting hardware.
- High traction pneumatic tires, knobby rears, grooved fronts.
- High-impact nylon rear rims fit Associated and Tamiya "Holiday" tires.
- Quick-change knock-off rear hubs are key-locked to the axle.
- High-impact nylon front rims. Adapters are included for Tamiya front tires.
- Quality screws throughout. Allen cap, button, flat head, and aluminum flat head.
- Step-by-step assembly instructions, with photos of every step.

In addition, some kits include all or part of the following:

- Yokomo stock class 05 motor.
- Heavy-duty throttle resistor, wiper, bypass, and mounting bracket.
- 16 gauge silicon wiring harness, with dropping diodes for radio.
- Durable clear Lexan body shell, with driver and adjustable wing.
- 6-cell Ni-Cad pack and Fast-charge Cord.
- Precision ball bearing set, 16 bearings total.

All kits come packaged in a durable, four-color carton which can serve as a handy parts and toolbox at the race track. These cars will work with any radio system, but steering wheel radios with ultra-mini sized servos are preferred (see Radio section, page 7).

#6000	Basic kit, less all electrical, less bearings	\$188.00
#6010	Full kit, less battery, less bearings	225.00
#6012	Full kit, less battery, body, wing, bearings	215.00
#6016	Full kit, ball bearings, less battery	290.00
#6020	Full kit, with battery pack, less bearings	265.00

DEALERS—kits are packed 6 per case.
